

# ATM VIDEO TOPPER

The ATM-ADS FS-1 is a free standing ATM surround that houses a 19" LCD panel and hardware to drive the panel. The FS-1 contains stereo audio speakers behind louvered and filtered panels. The display is covered by high-impact lexan that can withstand a rough environment and mild abuse.

The units operate on the proprietary VLAD software that enables simple integration of internal video campaigns as well as generating third party advertising revenue.

The FS-1 bolts into the floor and installs easier than most bank machines. It's powder coated silver-vein for a neutral, textured and durable finish.

**MSRP: \$2,995**  
**AFTER \$750 ACTIVATION REBATE**

## HARDWARE:

**WIDE ANGLE 19" LCD PANEL**
